Giving Shape to Ideas

## **bizhub PRESS C71hc**

Be amazed by the High Chroma difference

# Leave your competitors behind with vivid colour

Naturally, you want your images to have as much impact as possible – whether you're a commercial printer or a creative professional. And while you're striving to provide better image quality, you need to achieve faster speeds, economically. However, you'll also be familiar with the limitations of printing in CMYK. Images shot from a digital camera usually express a wider colour gamut than CMYK printers can reproduce.

Results are often disappointing when using RGB images with CMYK standard printers. Undoubtedly, you'll have seen the resulting dullness of colours such as pink, purple and bright green.

That's why you'll appreciate the unequalled performance of the amazing new bizhub PRESS C71hc.

#### **Experience the High Chroma difference**

Now you can say goodbye to previous colour limitations. This bizhub PRESS C71hc uses revolutionary High Chroma toner – reproducing RGB colours more faithfully than previously seen before.

With High Chroma toner, you can achieve colours on paper that are much closer to the natural world. So it becomes an easy matter to match your computer monitor's images for colour and clarity. This is good news when you're striving to provide the highest possible print quality.

#### Super-fast and highly economical

Plus, this machine is great for your productivity – it delivers full colour print speeds of up to 71 impressions per minute (A4). It's ideal for commercial printers, print providers and graphic arts professionals – as well as advertising agencies or retail chains. In fact, anyone who wants high impact imagery, delivered quickly and economically.

### Unique colour capabilities for creative freedom

As the world's only professional digital press that utilises High Chroma toner – the bizhub PRESS C71hc is free from the restrictions imposed by the colour gamut of ordinary toners. It gives you the creative freedom to deliver outstanding expressive capabilities on the printed sheet.

#### Seamless cross-media applications

Now you can be sure that your images and colours are being presented consistently – whether on-screen or on the printed page Personalised Direct Marketing pieces can be produced which truly reflect brand identities.

This makes the bizhub PRESS C71hc an essential link in the chain, when producing cross-media marketing campaigns. It's fast, flexible, and handles a wide range of media.

#### Colour gamut comparison

This comparison shows the extraordinary extra latitude made available by High Chroma toner

#### Maximising the advantages of High Chroma Toner

To take best advantage of the High Chroma Toner characteristics, Konica Minolta has developed three specific modes:

#### 1. Standard Mode

In this mode, colours produced on the monitor screen are reproduced using RGB – taking advantage of the wider colour gamut.

#### 2. Saturation Mode

With enhanced saturation, this mode provides impactful and bright images.

#### 3. Soft Mode

Colour graduations are softened to improve reproduction of image elements such as shadows and reflections.

#### **Eye-catching output**

Of course, skin tones are the ultimate test. With the bizhub PRESS C71hc it is now possible to achieve superb saturation and brightness, enabling you to produce skin tones with unprecedented smoothness.

This smooth skin tone reproduction makes the bizhub PRESS C71hc ideal for studio photography and photo book printing. In addition, high-quality output is assured for items such as cosmetics or fashion catalogues.

Its wide colour gamut also makes it perfect for eye-catching Point of Sale material, stationery and presentation documents. Neutral greys are another challenge, and this machine handles them effortlessly.

#### Image comparison

Comparison of images from bizhub PRESS C71hc with images from an ordinary CMYK Printer

## Multiple innovations working in harmony

Deliver accurate, repeatable colour with the bizhub PRESS C71hc. With innovations like S.E.A.D 11 (Screen-Enhancing Active Digital Processing) and dot position control technology, the image retention and stability on the bizhub PRESS C71hc rivals results seen with offset printing.

With the bizhub PRESS C71hc you keep your customers happy thanks to maximum uptime guaranteed by the 'air-assist' paper feed technology and the alibility to make necessary adjustments on the fly.

## Constructed to deliver long-term reliability and productivity

The bizhub PRESS C71hc is built around a high-strength steel frame that will perform reliably, day after day.

#### High precision registration unit

For ultimate accuracy, sheet position is detected by a high precision sensor and the registration swing mechanism conveys the sheet to the correct position. This produces flawless sheet position and registration – no matter what type of media you're using.

#### Ultimate versatility with a range of options

Take advantage of the comprehensive versatility of the bizhub PRESS C71hc. It can be configured in over 46 different system combinations, which is sure to meet your needs.

An array of finishing options means you can offer your customers saddle stitching for booklets, 3-sided trimming and creasing, perfect binding and so much more.

So you can make sure your business is positioned to add as much value as possible – at every stage through to the finished print.

The bizhub PRESS C71hc is highly flexible, handling a wide range of media stocks and weights, handling sizes from A5 to SRA3 (max 300 x 480 mm) – in weights 64 to 300 gsm.

## **Specifications**

Printer specifications	
Print speed A4	Up to 71
Print Speed A3	Up to 38
Print resolution	Max.: 1,200 x 1,200 dpi x 8-bit
